

# DANIEL YAROSHOVETS

## FRONTEND DEVELOPER

[My website](#)[My LinkedIn](#)[My email](#)[My telegram](#)[My GitHub](#)

## PROFILE

I am a passionate frontend developer, who got interested in frontend not a long time ago and started developing my first pet projects. I love developing sites using React, TypeScript, and ReduxToolkit. I also tried to develop with MERN stack to dive a bit into the backend. Currently, I am learning Next JS. You can visit [my website](#) if you want to find more information about me.

## PET PROJECTS

**Pizzeria** (TypeScript, React, Redux Toolkit, RestAPI, localStorage)

**Promptopia** (Next JS, React, Tailwind CSS, NextAuth.js)

**MERN Blog** (React, Redux Toolkit, Express, Node JS, MongoDB, localStorage)

**Chess** (React, TypeScript, OOP)

**Todo** (React, TypeScript, Redux, MUI)

**Shop** (React, RESTful API, context)

**Find GitHub** (React, RestAPI, debounce)

## EDUCATION

**Polish-Japanese Academy of Information Technology**

Bachelor Computer Science  
(2022-present)

**Taras Shevchenko National University of Kyiv**

Bachelor International Economics  
(2021-present)

## LANGUAGES

- English (C1)
- Ukrainian (native)
- Russian (native)
- German (B1),
- French (A1)
- Polish (A1)

## SKILLS

**Frontend:** Next JS, TypeScript, JavaScript (ES6+) React JS, Redux Toolkit, Redux, Redux Thunk, React-router v6, React Hook Form, Formik, Material UI, Websockets, MobX, SCSS, BEM, styled-components, CSS Modules, Axios

**Backend:** Node JS, Express, JWT, MongoDB, RESTful API

**Other:** Java, C++, OOP, JSON, JSON-RPC, GitHub, git, ESLint, Figma, Adobe Photoshop, Word, Excel, PowerPoint, Outlook, Final Cut Pro

**Soft skills:** Critical thinking, leadership, flexibility, creativity, positive thinking, teamwork skills, decision-making

## EXPERIENCE (1 year and 5 months Freelance)

### Frontend developer React JS

**1) Developed an online programming learning platform from scratch with design from Figma**

*Features:*

- A video player integration
- Authorisation by email and Google
- After each learning section a small test was given
- Dynamic chart of user's learning progress
- Light and dark theme feature
- Frequently asked questions section

**Stack:** React js, TypeScript, Redux Toolkit, MUI, axios

**2) Developed a website for a bus company from scratch using Figma design, offered a few changes in the design for better ux and ui**

*Features:*

- An ability to find available tickets change routes and dates of the ride
- Increasing the amount of passengers + an ability to use discounts and some benefits
- An ability to sort and filter the tickets by price, duration, and departure/arrival time
- Contact by email directly from the website
- Storing information in the localStorage so the info saves after user's page reload

**Stack:** React js, Redux Toolkit, React Hook Form, SCSS, axios

**3) Developed a blog website for a photographer from scratch with custom design**

*Features:*

- An ability to change the content of the website directly from the website
- CRUD functionality
- Quantity of likes and views on the photos

**Stack:** React js, Node js, MongoDB, Express js, SCSS.
